1. In-Chat Shopping & Cart Management

DIRECT ACTIONS

Customers never need to search across complex menus. They simply chat, and the AI manages their live store cart in real time.

1. Direct Add to Cart via Chat

WORKING

Customers can ask in plain conversational language to add any item, instantly synchronizing with the store's live cart.

```
Customer: "Add Bacteriostatic Water to my cart"
→ Added 1x to cart & updated checkout subtotal.
```

2. Add Multiple Products at Once

WORKING

Customers can add multiple different products and strengths in a single message without repetitive steps.

```
Customer: "Add 1 Tirz 30mg and 4 Tirz 10mg to my cart"
→ Both added simultaneously with exact quantities.
```

3. Relative Quantity Increment (+1)

WORKING

Understands natural arithmetic like "add one more" or "increase quantity by 1", updating from 1× to 2× without resetting.

```
Customer: "Increase the quantity of Tirz 30mg by 1"
→ Automatically updated quantity from 1x to 2x.
```

4. Relative Quantity Decrement (-1)

WORKING

Customers can safely reduce item quantities by saying "remove one" or "decrease by 1", maintaining a safe minimum of 1×.

```
Customer: "Reduce Tirz 10mg quantity by 1"
→ Decreased quantity safely in cart.
```

5. Bulk Multi-Item Quantity Set

WORKING

Set specific quantities for multiple distinct items in a single command without updating each item individually.

```
Customer: "Set Tirz 10mg quantity to 5 and Tirz 30mg to
10"
→ Both items updated simultaneously in 1 turn.
```

6. Instant Un-Cart & Item Removal

WORKING

Immediately removes unwanted items from the cart whenever a customer changes their mind.

```
Customer: "Remove Bacteriostatic Water from my cart"
→ Item removed from cart with instant confirmation.
```

7. Instant Product Swap & Replace

WORKING

If a customer selected the wrong dosage or product, the bot swaps it for the correct one in one seamless action.

```
Customer: "I meant 10mg instead of 60mg, please swap it"
→ Removed 60mg and added 10mg in 1 step.
```

8. Dosage vs. Quantity Protection

WORKING

Prevents costly billing errors: recognises that "10mg" or "60mg" is product strength, NOT quantity 10 or 60!

```
Customer: "Add Tirz 10mg to my cart"
→ Adds Qty = 1x (never falsely charges for 10x).
```

2. Conversational Intelligence & Customer Support HUMAN-LIKE AI

No robotic answers. The bot speaks your customer's language natively and handles inquiries with high conversational accuracy.

🌐 9. Dynamic Language Mirroring ✅ WORKING

Automatically detects customer language and responds 100% in English, Spanish, or other preferred store languages without mixing.

```
English: "What products do you offer?" → Pure English reply.
Spanish: "¿Qué productos tienen?" → 100% pure Spanish reply.
```

🚫 10. Smart Negation Detection ✅ WORKING

If a customer says "don't add anything, just show me the list", the bot never accidentally adds products to their cart.

```
Customer: "I don't want to add anything, just show products"
→ Displays catalog safely; zero cart actions triggered.
```

👁️ 11. Live Interactive Product Cards ✅ WORKING

Displays clean product cards with verified imagery, in-stock badges, live prices, (-/+) steppers, and direct 1-click Add to Cart.

```
Result: Visual product cards directly inside chat stream.
```

💵 12. Budget-Aware Price Search ✅ WORKING

Customers can filter by budget, and the bot recommends verified products within their specified price range.

```
Customer: "What products do you have under $20?"
→ Recommends Bacteriostatic Water at $15.00.
```

🚚 13. Real-Time Order Tracking ✅ WORKING

Customers can check dispatch and courier tracking status 24/7 simply by providing their Order ID.

```
Customer: "Track order #1042"
→ Fetches live shipment status and tracking link.
```

🔒 14. Secure 2-Factor Order Cancellation ✅ WORKING

Prevents fraudulent cancellation requests: requires both Order ID AND Billing Email verification before cancelling orders.

```
Customer: "Cancel order #1042 for user@example.com"
→ Verified billing email and marked cancelled securely.
```

🛑 15. Anti-Troll & Anti-Spam Shield ✅ WORKING

Protects store bandwidth from spam: gentle nudge on turn 2, firm warning on turn 3, and silence on repeated chatter.

```
Customer: Repeated off-topic pleasantries
→ Protects bandwidth; guides customer to serious business.
```

💳 16. 1-Click Checkout Direct Link ✅ WORKING

When ready to pay, provides the shopper with a direct link taking them straight to the checkout page with cart pre-loaded.

```
Customer: "I'm ready to checkout"
→ Sends direct secure link to /checkout/.
```

3. Automated Test Proof & Verification Matrix VERIFIED IN CODE

Feature Name	Tested Customer Message	Executed Engine Action	Status
Multi-Item Add	"Add 1 Tirz 30mg and 4 Tirz 10mg"	Added 1× 30mg & 4× 10mg in 1 turn	PASSED
Quantity Math	"Increase Tirz 30mg quantity by 1"	Incremented cart quantity: 1× → 2×	PASSED
Bulk Multi-Set	"Set Tirz 10mg to 5 and Tirz 30mg to 10"	Updated both items to 5× and 10×	PASSED
Negation Guard	"Don't add anything, just show products"	Showed catalog; 0 items added	PASSED
Language Match	"What products do you offer?"	100% pure English response	PASSED
Secure Cancellation	"Cancel order #1042 for user@domain.com"	Verified email & cancelled order	PASSED
